### Letters to the Editor

#### Resumed spin-up in GX 1+4

*Greenhill, J.G., Giles, A.B., Sharma, D.P., Dieters, S., Sood, R.K., Thomas, J.A., Waldron, L., Manchanda, R.K., Carli, R., Hammer, P., Kendziorra, E., Staubert, R., Bazzano, A., Ubertini, P., La Padula, C.*

L1

#### Implications of the millimeter emission from Supernova 1987 A

*Salvati, M., Pacini, F., Oliva, E., Bandiera, R.*

L5

#### Probable additional gravitational images related to the Cl 2244-02 arc and B, V, R photometry of the cluster core

*Hammer, F., Le Fèvre, O., Jones, J., Rigaut, F., Soucail, G.*

L7

#### Supernova 1987 A: envelope metallicity and the nature of the soft X-ray component

*Mastichiadis, A., Kylafis, N., Ventura, J.*

L11

#### Observations of the Einstein Cross 2237+030 with the TIGER Integral Field Spectrograph

*Adam, G., Bacon, R., Courtès, G., Georgelin, Y., Monnet, G., Pécontal, E.*

L15

### Cosmology

#### Gauge-invariant cosmological perturbation theory for collisionless matter: numerical results

*Durrer, R.*

1

### Extragalactic astronomy

#### Cross-like radio structure in NGC 6500: Evidence for bipolar outflow?

*Unger, S.W., Pedlar, A., Hummel, E.*

14

#### A jet-like optical continuum filament in the active galaxy NGC 1275 (Perseus A)

*Meaburn, J., Allan, P.M., Clayton, C.A., Marston, A.P., Whitehead, M.J., Pedlar, A.*

17

#### Extended X-ray emission from hot gas around the normal giant elliptical galaxy NGC 5846

*Biermann, P.L., Kronberg, P.P., Schmutzler, T.*

22

#### Radio continuum emission and arm classification in spiral galaxies

*Giuricin, G., Mardirossian, F., Mezzetti, M.*

27

#### The magnetic field of NGC 6946

*Harnett, J.I., Beck, R., Buczkowski, U.R.*

32

#### A detailed study of the OH megamaser galaxy IRAS 17208-0014

*Martin, J.M., Bottinelli, L., Dennefeld, M., Gouguenheim, L., Le Squeren, A.M.*

39

#### Formation of Ca II lines in active galactic nuclei

*Joly, M.*

47

### Formation, structure and evolution of stars

#### The evolution of low-mass close binary systems with a compact component. II. Systems captured by angular momentum losses

*Pylyser, E.H.P., Savonije, G.J.*

52

#### Studies of symbiotic stars. I. Location of the UV emitting regions in 6 S-type systems monitored by the IUE satellite

*Munari, U.*

63

#### Models of head-on collisions between a white dwarf and a low-mass main-sequence star

*Różyczka, M., Yorke, H.W., Bodenheimer, P., Müller, E., Hashimoto, M.*

69

#### A multifrequency study of circumstellar envelopes of cool giants and supergiants

*Heske, A.*

77

#### The UU Herculis star HD 161796

*Mantegazza, L., Antonello, E., Poretti, E.*

91

#### Radiation hydrodynamics of the boundary layer in accretion disks. I. Numerical methods

*Kley, W.*

98

#### Evolutionary status of W Ursae Majoris-type binaries: evolution into contact

*Sarna, M.J., Fedorova, A.V.*

111

#### The thermal surface boundary condition for stellar pulsations

*Gabriel, M.*

122

#### HD 112481 and HD 145794, two $\beta$ Cephei stars

*Waelkens, C., Heynderickx, D.*

129

#### The maximum amplitude of the optical micro-variations of massive O-F type stars (or $\alpha$ Cygni variables, including LBV's or SDor variables) across the HR diagram

*van Genderen, A.M.*

135

#### (RN) Infrared observations and the fundamental properties of white dwarf stars

*Leggett, S.K.*

141

# EXOSAT observations of the X-ray burst source 4U 1608-52

*Penninx, W., Damen, E., Tan, J., Lewin, W.H.G., van Paradijs, J.* 146

## The relativistic "looks" of a neutron star

*Nollert, H.-P., Ruder, H., Herold, H., Kraus, U.* 153

## Stellar atmospheres

### (RN) Revision of the absolute scale of the Oxford Ti I oscillator strengths and the solar titanium abundance

*Grevesse, N., Blackwell, D.E., Petford, A.D.* 157

### Activity in late-type dwarfs. III. Chromospheric and transition region line fluxes for two dM stars

*Byrne, P.B., Doyle, J.G.* 159

### Radiative transfer in supernova-like envelopes: curvature and diffusion effects

*Simonneau, E., Isern, J., López, R.* 166

### Abundance of manganese in metal-poor stars

*Gratton, R.G.* 171

### Mapping stellar surfaces by Doppler imaging: technique and application

*Rice, J.B., Wehlau, W.H., Khokhlova, V.L.* 179

### Magnetic fields in late-type dwarfs: Preliminary results from a multiline approach

*Mathys, G., Solanki, S.K.* 189

### (RN) High resolution IUE observations of the flare star AD Leonis: implications for the Mg II Wilson-Bappu effect

*Ambruster, C.W., Pettersen, B.R., Sundland, S.R.* 198

### Rotational modulation of hydrogen Lyman $\alpha$ flux from 44 $\gamma$ Bootis

*Vilhu, O., Neff, J.E., Rahunen, T.* 201

### Optical flares from the dwarf M star V 577 Mon (Gliese 234 AB = Ross 614)

*Doyle, J.G., van den Oord, G.H.J., Butler, C.J.* 208

### Photometric and spectroscopic study of three candidate Herbig Ae/Be stars: HD 37411, HD 100546 and HD 104237

*Hu, J.Y., Thé, P.S., de Winter, D.* 213

### (RN) Molecular line spectra from circumstellar envelopes. II. The envelope of IRC + 10216

*Schönberg, K.* 219

### A study of ultraviolet spectra of $\zeta$ Aurigae/VV Cephei systems. XI. 22 Vulpeculae: IUE observations of its extended chromosphere and wind with spatial resolution

*Schröder, K.-P., Reimers, D.* 223

## Diffuse matter in space (including H II regions and planetary nebulae)

### Scanning interferometer observations of the SNR N 186 D in the Large Magellanic Cloud

*Laval, A., Rosado, M., Boulesteix, J., Georgelin, Y.P., Marcellin, M., Monnet, G., Le Coarer, E.* 230

### H 166 $\alpha$ emission from the southern galactic plane

*Cersosimo, J.C., Azcárate, I.N., Hart, L., Colomb, F.R.* 239

### 2CG 013: a "monoenergetic" source of cosmic rays?

*Özel, M.E., Ormes, J.F.* 247

## State selective excitation of O III by charge transfer of O IV with H

*Gargaud, M., McCarroll, R., Opradolce, L.* 251

## Carbon monoxide along the line of sight to galactic center infrared sources

*Geballe, T.R., Baas, F., Wade, R.* 255

## The Sun

### Interaction between a line current and a two-dimensional constant- $\alpha$ force-free field: an analytical model for quiescent prominences

*Amari, T., Aly, J.J.* 261

### An improved solar lead abundance

*Youssef, N.H., Khalil, N.M.* 271

### Comments on coronal mass ejection onset studies

*Harrison, R.A., Sime, D.G.* 274

### Langmuir wave generation by thick target electron beams in solar flares: the effects of density variations and reverse currents

*McClements, K.G.* 279

### Accurate solar photospheric abundances: a comparison with meteorite data

*Booth, A.J.* 287

### Oscillations of the Sun's chromosphere. V. Importance of network dynamics for chromospheric heating

*von Uexküll, M., Kneer, F., Malherbe, J.M., Mein, P.* 290

### Solar oscillations as seen in the Na I and K I absorption lines

*Isaak, G.R., McLeod, C.P., Pallé, P.L., van der Raay, H.B., Roca Cortés, T.* 297

### The decrease of penumbral velocity and magnetic field at the outer sunspot boundary

*Wiehr, E., Balthasar, H.* 303

### The behaviour of asymmetry and other profile parameters of the Fe I $\lambda$ 5576.1 Å line in solar regions of varying magnetic activity

*Immerschmitt, S., Schröter, E.H.* 307

## The solar system

### Modelling asteroid brightness variations. I. Numerical methods

*Karttunen, H.* 314

### Modelling asteroid brightness variations. II. The uninterpretability of light curves and phase curves

*Karttunen, H., Bowell, E.* 320

### Restoration of Vega-1 pictures of the nucleus of comet P/ Halley: a new method revealing clear contours and jets

*Dimarellis, E., Bertaux, J.L., Abergel, A.* 327

## Physical and chemical processes

### On the electrostatic potential and charge of cosmic grains. III. Grains in diffuse and dense interstellar clouds

*Bel, N., Lafon, J.-P.J., Viala, Y.P., Loireux, E.* 331

### (RN) Effective collision strengths for fine-structure forbidden transitions in the $3p^3$ configuration of Cl III

*Butler, K., Zeppen, C.J.* 337

Photoproduction of high-frequency gravitational radiation by galactic and extragalactic sources <i>Papini, G., Valluri, S.-R.</i>	345
Synchrotron radiation treated by the Weizsäcker-Williams method of virtual quanta <i>Lieu, R., Axford, W.I., Quenby, J.J.</i>	351
Power-law dependence of the pressure broadening of spectral lines on temperature <i>Bielski, A., Bobkowski, R., Szudy, J.</i>	357
Two-dimensional isothermal magnetostatic equilibria in a gravitational field. I. Unsheared equilibria <i>Amari, T., Aly, J.J.</i>	361

# **Instruments, data processing, and computational methods**

Simulated annealing image reconstruction in photon-limited stellar speckle interferometry <i>Navarro, R., Fuentes, F.J., Nieto-Vesperinas, M.</i>	374
Terrestrial transmitters as phase calibrators in disconnected interferometry <i>Woan, G., Duffett-Smith, P.J.</i>	381
Site testing for an optical observatory in Turkey <i>Aslan, Z., Aydın, C., Tunca, Z., Demircan, O., Derman, E., Gölbaşı, O., Marşoğlu, A.</i>	385
Application of Lagrangian multipliers in hybrid mapping <i>Massi, M.</i>	392
